## Camera support in Ethisis 10.2.0.1

Gray cell	Camera is not supporting
Blank cell	Camera supports, Ethisis not
✓	Ethisis + camera full support

### Axis probe

Ethisis has support for probing for certain camera brands.

At the moment probing for Axis cameras is supported. This means that all cameras with firmware 4.40 or later can be connected to Ethisis.

Ethisis has support for video, PTZ, I/O and Events via probed Axis cameras.

### ONVIF

Ethisis has support for video, PTZ, I/O and Events via ONVIF.

Kentima has not tested all the cameras in the world, but cameras with support for ONVIF Profile S will most probably be able to be connected to Ethisis.

### Generic

Ethisis also has support for video via RTSP.

This means that cameras with support for RTSP may be connected to Ethisis by selecting the type 'Generic' and then enter a so called 'URL' for receiving video from the camera.

This means that even though you don't find a specific camera model in the following list, the camera will most likely be able to be connected anyway via Axis probe, ONVIF or Generic.
